THINK GREEN

D-Link's DGS-1016D 16-Port Gigabit Switch and DGS-1024D 24-Port Gigabit Switch are part of a new series of SOHO/SMB devices that make use of D-Link's 2nd generation Green Ethernet technology, providing more energy savings and a longer product life without sacrificing operational performance or functionality. Recyclable packaging and minimized use of harmful substances (RoHS compliant) make this switch truly environmentally friendly.

CONSERVES ENERGY

By building on the foundation of D-Link's 1st generation of Green Ethernet technology, the 16/24-Port Gigabit Switch helps you conserve energy automatically through several methods. It automatically powers down ports that have no link, allowing the switch to save substantial amounts of power by cutting power usage for unused ports or ports connected to computers that have been shut down. It can also detect connected cable lengths, and adjusts power usage accordingly, helping you save energy without affecting networking performance.

ENVIRONMENTALLY FRIENDLY

The 16/24-Port Gigabit Switch was designed with the environment in mind, and was built to follow RoHS standards to minimize use of hazardous materials. It uses recyclable packaging that helps reduce waste, and complies with the WEEE directive.

GIGABIT CONNECTIONS FOR SOHO AND SMB

The DGS-1016D/1024D switches offer an economical way for SOHO and small to medium businesses (SMB) to benefit from the increased bandwidth of Gigabit Ethernet. They provide 16 or 24 Gigabit ports for fast server deployment to meet increasing network loads.

IEEE 802.1p QoS

QoS prioritizes network traffic so that time-sensitive data is delivered efficiently, even during bursts of high data traffic. This helps ensure an optimal experience for streaming media, VoIP calls, and online gaming.

CABLE DIAGNOSTICS FUNCTION

The D-Link Cable Diagnostics Function enables users to efficiently detect cable conditions through the LEDs on the front-panel. Users can determine whether the pin connections of their cables' connectors are correct, facilitating network troubleshooting.
