

KX-NS1000V3

BUSINESS COMMUNICATIONS SERVER

DISCOVER A WORLD OF BENEFITS IN ONE BUSINESS COMMUNICATIONS SOLUTION

Business communication servers must provide solutions to real-world business challenges, such as: simplifying and improving communications; lowering costs; improving productivity; supporting SOHOs; and diversifying of the workplace. They should do all of these while flexibly adapting to the way each organisation works. The KX-NS1000 Business Communications Server by Panasonic is designed to deliver these solutions. It does this by integrating hardware and software components in a modular way, allowing you to tailor a communications system to your specific needs.

Furthermore, users of an existing Panasonic legacy PBX can easily migrate to an IP system by connecting a KX-NS1000 server. Legacy systems can also be expanded to perform partial migration according to the available budget.

You can easily integrate your system with the KX-NS1000, depending on your specific needs or budget, because the KX-NS1000 is suitable for all kinds of businesses and industries, such as sales, customer service, hospitality, healthcare, and home teleworkers.

KEY FEATURES

- IP and SIP network communication server
- Integrated unified messaging with up to 24 ports per unit
- Build systems for up to 8,000 users
- Reliable backup system to survive system failures
- Call centre solution with voice guidance for customers
- High-performance applications

KX-NT556 - New IP Terminal

KX-TCA385 - New DECT Phone

Improved call centre solution

WHAT'S NEW ABOUT THE KX-NS1000V3?

EASY SETUP

Even in remote locations, such as the homes of teleworkers, IP phones can be easily installed from a single site and used as extensions. The same method can be used to extend a VPN to the entire office network for more secure communication.

GRADUAL IP MIGRATION TO SUIT YOUR BUDGET

In addition to customers seeking total IP migration, the KX-NS1000 supports phased implementation of future IP migration for customers that wish to use existing equipment.

CALL CENTRE SOLUTION

Voice guidance for customers and call data can be output to reports and analysed for improved customer satisfaction. Call data can be saved to an external server and exported as necessary.

WIRELESS SOLUTIONS

Softphones and desk phones can be paired and used with a single extension number, which leads to improved work efficiency.

VARIED TERMINAL LINE-UP

A wide range of terminals and handsets are available to meet various user needs.
