

All sumps are fully compliant with HSE legislation and environmental pollution prevention guidelines

## Model GRS / GKS, with steel or plastic spill pallet and 2 grid shelves

- **Secure storage of small containers and drums up to 205 litres**
- Shelf frames are powder coated, blue (similar to RAL 5019), cross members are orange (similar to RAL 2004), grid mesh is galvanised
- Especially stable with mesh struts in the shelf frames
- Shelving height can be adjusted in 25 mm increments
- Can be expanded at any time
- Delivered flat packed with instructions for easy self assembly
- **Model GKS: approved for the storage of substances in all water-polluting classes and aggressive chemicals for example acids or alkali**
- **Model GRS: approved for storing flammable liquids and substances in all water-polluting classes**

Hazardous substances rack type GRS 1250 with painted steel spill pallet, basic shelf with extension shelf

**from £ 614.00**

Hazardous substances rack model GRS 1250, with painted steel spill pallet

Rack Model RF 1850, Order no. 199-677-J9, £ 179.00

**Standard equipment and accessories:**  
Each rack bay is supplied with 4 shelves.  
Additional shelves incl. reinforcement cross-bars are available as accessories.

### Model RF / RL, flexible, simple push-fit design

- Flexible, sturdy storage system with push-fit, easy assembly
- For the professional and individual storage of workshop materials, production accessories etc.

Each basic shelving unit consists of 2 galvanised frames, extension shelving units have one frame. The galvanised shelves are fitted in special reinforced cross members. This allows just a few individual components to create a stable yet flexible shelving system.

- Galvanised frame
- 4 galvanised shelves for storage
- Sturdy construction with reinforcing crossbars
- Shelving height can be adjusted in 25 mm increments
- Can be expanded at any time
- Delivered flat packed with instructions for easy self assembly

**from £ 179.00**

**i** All racking is galvanised for optimum corrosion protection

## Model AWK, for the safe storage of drums, canisters or small containers

- For the storage of substances in all water-polluting classes and aggressive chemicals for example acids or alkalis
- Safe dispensing over the protruding model PolySafe spill pallet

The acid and alkali resistant PolySafe spill trays manufactured from polyethylene ensure maximum protection with this racking system. Stackable racking, an individual system for the storage of 205 ltr. And 60 ltr. Drums, plastic canisters from 20 - 60 litres and other smaller containers.

- Tried and tested shelving combination consisting of rack and spill pallet
- Sturdy steel construction, galvanised
- With forklift pockets for optimum handling
- Spill pallet made of polyethylene (PE) with high chemical resistance
- Delivered flat-pack, with instructions for assembly

### Model RWP, plastic containment racking

- For existing shelving systems, the simple, economic way to convert to legally-compliant hazardous materials stores
- Space saving containment racking for fitting in pallet racks
- Highly resistant to aggressive chemicals such as acids or alkali
- Manufactured from environmentally friendly polyethylene (PE)
- The containment racking rests securely on the cross beams
- Removable grid either in steel or plastic

**from £ 522.00**

Containment racking KRW in plastic

### Model PRW, steel containment racking

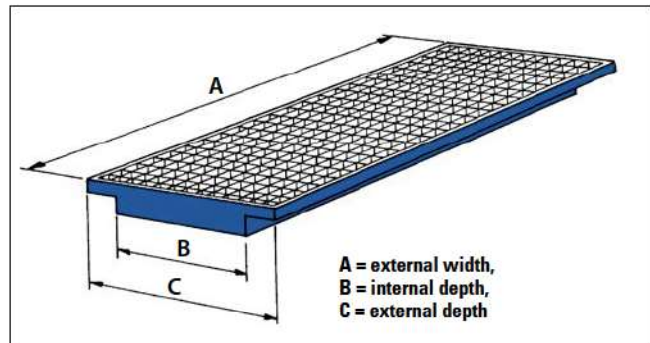

- For existing shelving systems, the simple, economic way to convert to legally-compliant hazardous materials stores
- Containment racking for fitting in pallet racks, space saving
- For storing flammable liquids
- Welded steel design
- Corrosion protection with high-quality paint, gentian blue (RAL 5010)
- The containment racking rests securely on the cross beams
- Removable hot dip galvanised grid as storage surface

**from £ 553.00**

### Model RWP, plastic containment racking

- For existing shelving systems, which are to be used for hazmat storage
- For all current shelving widths

**from £ 482.00**

Containment sump in polyethylene (PE) for placing under existing shelving systems, available in 5 sizes

- Base spill pallet for setting under existing pallet racks
- **For the storage of aggressive chemicals for example acids or alkali and substances in all water-polluting classes**
- Manufactured from environmentally friendly polyethylene (PE)
- 100 mm clearance between base and floor for handling and loading with forklift trucks

The PE containment racking can easily be transported indoors using a forklift

## Combi-racks - the multifunctional storage system

### ■ Design your own shelving with base and extension shelves

Combi Racks can be combined to suit your individual requirements. Whether you are storing IBCs, standing or horizontal drums: You'll benefit from the large storage capacities in the smallest space. All shelving types are approved for the storage of water-polluting substances and form a clear bay width of 2700 mm

There's even more choice in the shop!  
 ➤ [denios.shop/pallet-racking](http://denios.shop/pallet-racking)

- ① Cross members powder coated red orange (RAL 2001), height adjustable in increments of 50 mm
- ② Spill pallet available in galvanised or painted finish
- ③ Spill guards with integral shelf guard (Model K, Model S)
- ④ Galvanised drum supports with shelf guard (Model L)
- ⑤ Hot dip galvanised grid shelf as a loading surface (Model K, Model S)
- ⑥ Shelving frame galvanised

#### Combi-rack Model K for storage of IBCs

Combi rack Model K, for up to 6 x 1000 litre IBCs

#### Combi-rack model S, for storage of standing drums

Combi rack model S, for up to 20 x 205 litre drums

#### Combi-rack model L, for storage of horizontal drums

Combi rack model L, for up to 12 x 205 litre drums

All sumps are fully compliant with HSE legislation and environmental pollution prevention guidelines

## Model K, for storage of IBCs

- Combine our best products
- For storing flammable liquids

Combi-rack Model K for the safe storage of up to 6 x 1000 litre IBCs - one of the most popular shelving systems. They are very stable and can take high loadings up to 3250 kg. Make your own individual hazardous substances rack - arrange basic and extension shelf units from these two shelving types to suit your needs.

- Shelving frame galvanised, cross members powder coated red-orange (RAL 2001)
- Galvanised fluid guides, on 3 sides of each shelf with integral shelf guard
- Storage levels with galvanised grid shelves, the bottom one has a spill pallet
- Suitable for storing Euro or chemical pallets
- Adjustable shelf height through hole distance of 50 mm
- Can be expanded at any time
- Delivered flat-pack, with instructions for assembly

**i** All racking is galvanised for optimum corrosion protection

Pallet racking Model P0, basic section

Collision protection corner, Order no. 203-606-J9, £ 47.50

Additional rack collision protection

From page **492**

## Type P0

■ Pallet racks save space, reduce processing time, improve working practices and so increase productivity

- Sturdy shelving system for all loading aids for example Euro or mesh box pallets
- Ideal for efficient, orderly and adaptable pallet storage
- Shelving frame galvanised, cross members powder coated red-orange (RAL 2001)
- Adjustable shelf height through hole distance of 50 mm
- Can be expanded at any time
- Delivered flat-pack, with instructions for assembly

Euro mesh box exchange pallet meeting UIC standard 435-3, ideal for storage and transport, Order no. 129-203-J9, £ 208.00

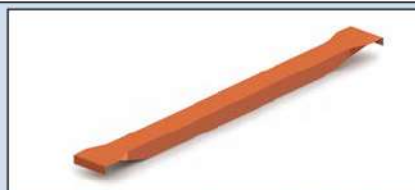

More information

See page **483**

## ACCESSORIES

Galvanised shelves allow direct storage of individual packets for example, see table; not suitable for pallet storage or use with a forklift.

Support rails ensure safe storage of various large pallets and diagonal storage of Euro pallets. Order no. 199-712-J9, £ 35.00

Galvanised grids to store different sized storage media next to each other or to create commissioning areas in shelves, see table.

Shelf guards prevent the load carrier / pallets from being pushed too far, see table.

Frame extension, 500 mm this ensures that the required drop protection of a minimum of 500 mm from the upper edge of the upper cross member is maintained Order no. 199-670-J9, £ 48.00

Mesh box load frame, so that these containers can be stored safely with side access. Order no. 199-673-J9, £ 79.50

**Pallet racking Model PO 18.25, basic and extension unit**

**i** Each shelf level is supplied with 2 pairs of transverse members, additional transverse members can be used (see accessories table).
