

Fire-rated hazardous material cabinets (30 or 90 min.)

The fire-rated hazardous material cabinets from DENIOS have outstanding quality. Each individual model has been tested in accordance with the requirements of the European Standard 14470 Part 1 or 2 by an independent materials test centre. Proven and legally-compliant accessories and store designs are available to create your individual solution for the storage of your flammable media.

Chemicals cabinets

The high quality DENIOS chemicals cabinet is based on a sturdy housing in powder coated fine sheet steel. Store your water-polluting substances in workrooms. Shorten your logistics chains and reduce the risk of accidents. Numerous options for fitted equipment make it easy to store hazardous substances professionally.

A special safety compartment meeting EN 14470 offers the required fire resistance for small quantities of flammable hazardous substances. Water-polluting media may be stored outside the box.

Chemicals cabinets with safety box

See page **145**

Corrosive liquids can also be flammable. The specially equipped Combi hazardous materials cabinets are ideally suited to this kind of requirement.

Fire-rated combi hazardous materials cabinets

See page **156**

Optimum fire protection and the highest levels of safety for pressurised gas cylinders in accordance with EN 14470 part 2

Fire-rated gas cylinder cabinets

See page **422-423**

Acid and alkali cabinets

Cabinets in corrosion resistant materials are ideal for the storage of non-flammable acids and alkalis. DENIOS offers corresponding cabinet systems in various materials and dimensions. From a small space saving wall mounted cabinet to a large drawer cabinet with 12 drawers, you'll be sure of a safe, economical solution.

Plastic cabinets
