SP MAX CORE MICROPROCESSORS

The core to the **SP Max Drive** program are the Max Core microprocessors that offer the ultimate charger to battery to tool interface to improve outright performance. We have embedded microprocessors in all three components to give users longer run times, charge and discharge protection, intelligent current flow and temperature protection.

With **SP Max Drive** using Max Core technology we can offer more work time, more power, more recharges and ultimately better performing tools.

SP MAX LITHIUM BATTERIES

The **SP Max Drive** cordless range is powered by next-gen INR chemistry battery cells. The INR chemistry combines the safety and low resistance of Manganese and the high energy capacity of Nickel. When we combine these cells with Max Core electronics, the result is a battery pack with superior performance and safety or in simple terms, the very best available.

> 12v

COMPACT, LIGHTWEIGHT & POWERFUL

This range is widely used in the automotive industries where size is important due to inaccessibility on today's vehicles and machinery. As most of the jobs are not repetitious, usually one battery will last the whole workday, so many of SP MAX DRIVE's 12V models are available with one or two batteries.

4.0Ah	SP81997
5.0Ah	SP81998

The SP Max drive cordless range is powered by next-gen INR chemistry battery cells. The INR chemistry combines the safety and low resistance of Manganese and the high energy capacity of Nickel. When we combine these cells with Max Core electronics, the result is a battery pack with superior performance and safety or in simple terms, the very best available.

- Longer run time
- Less charging
- Power when you need it
- Stronger coated contacts
- Longer life - More than double the recharges of normal lithium batteries

18V CHARGER

SP81988

18V BATTERY CHARGER

SP multi function microprocessor controlled 18 volt battery charger features a 9 stage control and protection system

- Programmable over-charge voltage
- End of charge current
- Temperature cut-off
- Safety charging time
- Receive charge termination signal
- Over-charge voltage protection
- Over-charge current protection
- Short circuit protection
