

# IMPACT & RATCHET WRENCHES

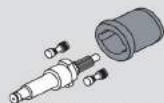

## ▶ IMPACT WRENCHES

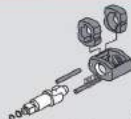

An impact wrench delivers a series of rotary blows to a fastener, producing torque. Chicago Pneumatic impact wrenches offer optimal power-to-weight ratio, fast rundown and great user comfort.

## ▶ RATCHET WRENCHES

For fastening applications in tight and difficult to access areas, CP offers a wide range of ratchet wrenches with various square drive sizes and up to 90 ft-lbs (122Nm).

### SELECT THE CLUTCH TYPE BEST FOR YOUR APPLICATION

**DYNA-PACT:**   
An extremely smooth clutch for better operator comfort which provides a high power to weight ratio

**Spring Hammer:**   
Evolution of the Twin hammer design which incorporates a spring for smoother operation

**Twin Hammer:**   
All around clutch with a high ultimate torque and high power to weight ratio

**Rocking dog clutch:**   
Ideal for very soft joints and provides high speed rundown

S2S Technology is the market's most convenient one handed impact wrench design. The operator can change between forward & reverse with one hand in any position. There is less stress/fatigue on operator's wrist and arm when changing between forward & reverse.

When using conditioned air at 90 psi, tightening and loosening of a fastener should not exceed 5 seconds. Excessive runtime to reach higher torques will decrease tool life. If the desired operation is not completed within 5 seconds, a higher performance tool is recommended.

### CHOOSE THE RETAINER YOU NEED

A wide selection of retainers provides versatility for every type of application. From simple friction ring retention for easy socket change to dual retention and spline configurations for maximum power transfer and safety.

-  Hole for pin o-ring type retention
-  Friction Ring for rapid socket change
-  Dual (Hole + Friction) for versatility
-  Quick Change for screwdriver bits or torsion bars
-  Spline for maximum torque transfer and durability
