

Welding technology for advanced industrial systems

Your partner for Industry 4.0

Hardware & Software 4.0

Interfaces and Remote Controls

Accessories always connected

Selco designs, develops produces complete systems for industrial welding. All components of the system, programs and welding processes, power units, peripheral units such as wire feeders and cooling units, accessories and interfaces are designed and built to communicate to each other and become a single efficient equipment in the hands of our customer. Each parameter and value is monitored in a simple and intuitive way and can be controlled remotely from anywhere in the network. Selco is a global and reliable partner for your 4.0 Industry activities

Selco products and services are the result of constant activities in research and technological innovation and therefore perfectly coherent with the Industry 4.0 guidelines

ICIM, leading certification body, certified that Selco products and services are suitable to be implemented into 4.0 Industry projects

Our attention to "research & development" may lead to changes in the information given here.
