

Personal Protection

Product Grading

Production

High performance industrial tooling designed for continuous use applications on machine tools where repeatability and long tool life are of critical importance.

Professional

Industrial tooling that has enhanced features and benefits demanded by craftsmen and professional users.

Industrial

Designed for regular use in industrial applications. Manufactured to stringent quality levels and international standards.

Workshop

Standard quality tooling for use by tradesmen and generally industrial use.

Maintenance

Products designed for general maintenance of machines, workshops, garages and some household applications.

Home Improver

DIY quality tooling. Designed for home use and light industrial applications.

FFP1 NR D: The dolomite test is an optional test under norms **EN 149:2001 +A1:2009**. Those respirators which pass the dolomite clogging test are proved to provide a more comfortable fit and resist clogging for longer.

SITESAFE Particulate Respirator Mask - Valved

SSDRV104
Conforms to **EN149 2001 FFP1** and **AS/NZS 1716:2003** standards. Provides protection against non-toxic harmful solid and liquid in concentrations up to 4 x NPF or 4 x APF, such as calcium carbonate, china clay, cement, cellulose, sulphur, cotton, flour, carbon, ferrous metals, vegetable oils and soft wood. Recommended applications for textile industry, craftwork, iron and steel industry, mining, woodworking etc. Exhalation valve to reduce hot air build-up. Maintenance-free (disposable).

EN12477 - Welding Gloves

EN12477:2003 defines relevant requirements and test methods for protective gloves for use in manual metal welding and allied processes. Under this standard, all gloves to be used for welding must be independently tested and certified by an official notified body, and must meet certain performance levels.

Type B gloves are recommended where high dexterity is required, e.g. TIG welding. **Type A** gloves are recommended for all other welding processes. The type and all appropriate markings (Pictograms) will be marked on the product, its packaging and the user instructions.

EN12477:2003 Minimum Performance Levels for Welding Gloves

	TYPE A	TYPE B
MECHANICAL RISKS (as per EN388:2003)

PERSONAL PROTECTION

Safe working at height both above and below ground is an increasing area of concern around the world and dropped tools are the second biggest cause of workplace fatalities. We have teamed up with **Tool@rrest** to act as one of a select group of agents delivering their **Retr@fit** service. We have fully trained personnel who can fit tethers to all your existing tools and ensure you are fully compliant with the **Work At Height Regulations 2005**.

KENNEDY PROFESSIONAL Tool Tethers, Lanyards & Accessories

Any Tool, Tether IT!

Dropped tools are a major cause of workplace injury and fatalities – most of which could be avoided with the correct tethering and use of tools. Safe use of tools at height begins with the tool tether, which acts as a secure attachment point for lanyards and ultimately tool belts and harnesses. Utilising a patented system developed by Tool@rrest, a pioneering name in the field of tethered tools, Kennedy can Retr@fit almost all new and existing hand tools with a certified, statistically fail-safe tether. This means you can enjoy industry leading tether safety without buying new tools and Retr@fitting can be carried out on your site or in a factory setting in a matter of seconds. And it doesn't stop there. Kennedy can now offer a complete solution to help prevent tools from falling, including securing of the tools-in-waiting (tools in the work belt or holster) and those in active use.

Wrist Lanyards

TWS-20C

Supplied complete with wrist wraps and swivel tail. Toggle style tails are also available.

Maximum working capacity: 2.0kg.
