# PRECISION, QUALITY, INNOVATION

For over 130 years, manufacturers, builders, and tradespeople around the world have relied on The L.S. Starrett Company's quality precision tools and saws to ensure the consistency of their work. They understand that the Starrett name on a saw blade, hand tool, or measuring tool guarantees exceptional quality, innovation, and expert technical support.

The thousands of products in today's Starrett line continue to be the most accurate, robust, and durable tools available, thanks to strict quality control, cutting-edge R&D, and an ongoing commitment to producing superior tools. This Catalogue includes the most commonly used tools on a Jobsite or in a Workshop.

## HOLE SAWS

Arbors, Pilot Drills, Core Ejectors, and our Debris Collector are all part of our complete line of Hole Saws and Accessories. All solutions to assist you in safely optimising each job while keeping the cost per cut in mind, saving you time and money.

Hole saw cutting speed recommendations (RPM) Page 24

05

## HACKSAWS

Bi-Metal Safe-Flex®, Redstripe, and high carbon Grey-Flex® blades, as well as hacksaw frames, compass, and PVC saws, are available to meet all of your sawing requirements.

25

## JIGSAW & RECIP BLADES

When compared to the previous line, Starrett's 3X Power blade technology provides up to three times the life and increased cutting rates. These ergonomic blades are suited to various applications and are engineered to excel in any demanding situation, providing a comprehensive set of sawing solutions.

31

## HAND TOOLS

The Starrett, Starrett Exact®, and Starrett Exact® Plus product lines include a wide range of high-quality Tapes, Levels, Knives, Rules, Squares, and other tools. All are dependable, accurate, and of high build quality. A Starrett Tool is always reliable.

39

## LASER DISTANCE METERS

Starrett Laser Distance Meters are highly accurate and advanced, with features such as IP54 protection, indirect measurement calculations, and Bluetooth® to connect to Android and IOS devices, as well as a downloadable app that allows users to control the meter via a smartphone or other compatible device.

57

## TRADESPERSONS TOOL BAGS

Quality hard-wearing tool bags with reinforced ABS bases, internal and external elasticated pockets, and compartments - these are ideal and dependable for all trades' tough day-to-day needs.

61

## SERVICES

Starrett offers a range of services and support to customers. Find out more on StarrNET, the new online ordering portal for our partners, as well as the Marketing and Technical Support options we have available.

## BI-METAL CSC CORDLESS SMOOTH CUT

The CSC - Cordless Smooth Cut Hole Saw. Offers exceptional strength, durability, and shatter resistance. Manufactured with hardened and abrasion-resistant high-speed steel teeth and a tough alloy body and cap, it is designed for use with battery-operated power tools. It will cut twice as many holes as the equivalent standard hole saw per battery charge. Its flared base cap limits the cutting depth to 13mm (1/2").

Featuring a heat-resistant high-speed steel edge, with alloy backing and a constant pitch of 8 TPI, it is ideal for cutting stainless and mild sheet steel, plasterboard, wood, and thin non-metallics.

### FEATURES

- Ideal for cutting stainless, tool & mild steel sheeting, wood and thin plastics.
- Safety stop at the base of the hole saw prevents saw travel beyond the hole saw depth - 13mm (1/2").
- Complete assembly - arbor, pilot drill and ejector spring included.
- Constant pitch teeth provide exceptionally smooth cuts. Pitch 8 teeth per 25mm / inch.
- Recommended cutting depth 3mm.

# FAST CUT BI-METAL FCH

The FCH - Fast Cut Saw with enhanced heat & wear resistance. Provides a smoother, faster cut on a wide range of materials. Specifically suited to cutting stainless and mild steel sheets, the Fast Cut will also cut through tubes with a wall thickness of up to 3mm (1/8").

**FAST CUT**

## BI-METAL HOLE SAWS

## FASTER & SMOOTHER

The FCH - Fast Cut Bi-Metal Hole Saws contain an extra cobalt HSS tooth material, and a 5.5 TPI positive rake tooth design ensuring a smoother and faster cut. Although designed for cutting stainless steel, metals, and mild steel sheet, the Fast Cut Saws will cut through wood, plastic, plaster, and other materials. Recommended cutting depth - up to 13mm (1/2") in softer materials.

### FEATURES

- With extra cobalt for enhanced heat and wear resistance - improving the product life.
- The 5.5 TPI positive rake tooth form provides less torque for a smoother, faster cut in all materials.
- 30% extra gullet volume for better material penetration.
- Ideal for 3mm stainless steel, mild steel sheet and tubes and other materials with a thickness of up to 13mm (1/2").
- Size range: 14mm - 210mm (9/16" - 8.9/32").
- 41mm (1.5/8") hole saw depth.

BI-METAL HOLE SAWS

# DEEP CUT BI-METAL DCH

The DCH - Deep Cut Saw with extra cobalt HSS teeth. Provides enhanced heat and wear resistance. The Deep Cut saw features an increased depth of 51mm (2") and is ideal for cutting metal and tubes with a thickness of greater than 3mm, and wood up to 51mm (2") thick.

**Starrett®**  
**DEEP CUT**

## BI-METAL HOLE SAWS

## DEEPER & STRONGER

Featuring a 10mm increase in cutting depth and aggressive material penetration with kerf clearance. It is the complete multi-use hole saw to penetrate deep into metals, wood, plastic, plaster, and other materials.

Recommended cutting depth – greater than 3mm (1/8”).

### FEATURES

- 51mm (2”) hole saw depth improves cutting performance on tubes, particularly where there is a need to cut through both sides.
- With extra cobalt for enhanced heat and wear resistance - improving the product life.
- Ideal for solid materials greater than 3mm (1/8”) in thickness.
- Aggressive material penetration and kerf clearance.
- Size range: 19mm - 210mm (3/4” - 8.9/32”).
- 51mm (2”) hole saw depth - requires arbors with an extended length pilot drill (e.g. A1E, A2E or A17-38E etc.).

| Cat. No. | Item Number | Diameter |          | Appropriate Arbors      |

# CARBIDE CT

## HIGH PERFORMANCE TRIPLE CHIP TUNGSTEN CARBIDE

The strong, high-performance triple chip Tungsten Carbide Tipped (CT) Hole Saw offers a longer blade life when cutting difficult and abrasive materials. A cost-effective solution for cutting through nail-embedded wood, or virtually any wood and metal combination, reinforced concrete, and fibreglass. This saw is particularly suitable where there is a requirement for a high-quality surface finish on the entry and exit hole and provides a smooth cut when cutting traditional lath and plaster.

### FEATURES

- A cost effective solution for cutting nail embedded wood, any wood and metal combination, reinforced concrete and fibreglass.
- Leaves high quality surface finish on entry and exit and provides a smooth cut.
- Tungsten Carbide Tipped Teeth for outstanding cutting performance and product durability.
- Suitable for use in electric and battery operated tools.
- Hole saw depth of 41mm (1-5/8").

## TUNGSTEN CARBIDE TIPPED MULTI PURPOSE

Tungsten Carbide Tipped Multi Purpose (MPH) Hole Saws feature a unique tooth set for ultra-aggressive, high performance cutting of non-metallics. Cutting speeds will be up to five times faster than a bi-metal hole saw cutting the same material, offering users with rapid, heat-free, stock removal of wood, MDF, plastics, and ceramic tiles. For tradespeople, our kits provide the perfect solution to all your cutting needs.

Offers multiple uses – will cut wood, MDF, plastics, ceramic wall tiles and building bricks.

### FEATURES

- Rapid, heat free stock removal of wood, MDF, plastics, plasterboard, and ceramic tiles.
- Carbide Tipped Teeth for outstanding cutting performance and product durability.
- Smooth cutting with minimal heat build up.
- Hole saw depth of 54mm (2.1/8").
- Arbors with extended length pilot drills are available, alternatively fit the longer A014CE pilot drill to our standard arbors.
- Deep gullet for easy core removal
- Suitable for use in mains and battery powered tools

# = MTO - Made to order, may be subject to longer lead times.

# CARBIDE SM STAINLESS STEEL [SHEET METAL]

Tungsten Carbide Tipped Stainless Steel (Sheet Metal – SM) Hole Saws are ideal for cutting high alloy and stainless steels, non-ferrous light metals and reinforced fabrics at much faster speeds than is possible with a bi-metal hole saw. Its tough tungsten carbide tipped teeth have a positive cutting angle which provides fast and efficient removal of chips and swarf. It is recommended for cutting sheet metal up to 3mm (1/8") thick.

## FEATURES

- Split-point drill for faster penetration and self-centring helping keep the drill on target and prevent wandering
- Ideal for production cutting, and particularly suitable for use in drills with limited speed control
- Tungsten carbide tipped teeth provide superb product life and cutting performance
- Replacement pilot drills are available
- Solid one-piece construction, with complete assembly including arbor and pilot drill
- Fitted with ejector spring for easy core removal
- Progressive carbide tooth grind offers faster cuts with minimal snagging, better swarf removal, minimising heat build up and prolonging the saw's life.
- New shallow gullet design increases tooth strength
- Safety stop at the base of the hole saw prevents drilling beyond the maximum cutting depth of 13mm (1/2")
- Recommended cutting depth 3mm (1/8")

# CARBIDE CTD

## CARBIDE TIPPED DEEP CUT

The Carbide Tipped Deep Cut (CTD) Hole Saw is the perfect solution for repeated intensive drilling in mild and stainless steel, cast iron, aluminium and copper of all thicknesses up to and including 25mm (1"). The Starrett CTD hole saws feature three different angles ground onto the cutting face of each tooth on the saw. This 3-ply tooth grind delivers a fast cut, minimal snag when the saw begins the cut, efficient swarf removal minimising heat build-up and maximum saw life.

### FEATURES

- 3-ply tooth grind on each tooth delivers maximum performance and makes the saw much more robust than 2-ply equivalents
- Tungsten carbide tipped teeth for excellent heat and wear resistance
- Solid one-piece construction, with no need for assembly
- Can be used with fixed or portable drills, mains power or cordless
- Supplied with an ejector spring to aid ejection of the core from the saw
- Replacement pilot drills and ejector springs are available
- 25mm (1") hole saw depth

# = MTO - Made to order. may be subject to longer lead times.

Carbide Tipped Arbors XA2 XA10 XA17-38 Locking Arbor XA2-1 (SDS plus)  
Kwik-Change with Carbide Tipped Pilot Drill XA015C A6 & A6-3\* (\*up to 100mm / 4")

## DIAMOND GRIT HOLE SAWS

High performance Diamond Grit Hole Saws are perfect for drilling holes in non-metallics and offer the ideal cutting solution for the toughest situations. Featuring a synthetic diamond grit cutting edge permanently bonded to a tough steel body, this provides the necessary clearance for cutting at high speeds.

### FEATURES

- Rapid cutting solution for non-metallics
- Smooth surface finish, ideal when cutting glass and ceramics
- Supported by a comprehensive range of arbors with carbide tipped pilot drills
- The ultimate hole saw for hard-to-cut materials
- Small diameter hole saws are perfect for kitchen and bathroom installations
- Cutting depth 38mm (1.1/2")
- Coolant should always be used with these saws

| Hole Saw Depth            | 41mm (1.5/8")                              |

Note: Diamond Tile Drills and Hole Saws should always be cooled with water.

## DIAMOND GRIT TILE DRILLS

- Small diameter hole saw, perfect for kitchen and bathroom installations
- Smooth surface finish, ideal when cutting non-hardened glass and porcelain
- Drive arbor and drill not required, as the tile drill is held directly in the power tool chuck
- Maximum cutting depth of 25mm (1")
- Core slot provides cooler cutting and allows for removal of debris produced during drilling

## DIAMOND DRI-CORE DRILLS

Diamond Brick and Masonry Dri-Core Drills are designed for intensive dry cutting on brickwork and blockwork. They are particularly suitable for plumbers, electricians and other installation engineers and an invaluable tool in the construction of flues, air vents and plumbing or electrical channels.

|                            |   |
|----------------------------|---|

### FEATURES

- Faster rate of cut than TCT alternatives with less pressure required.
- 300mm saw length on 22 and 28mm diameter saws. 150mm saw length on all other diameters.
- **Note:** not for use on reinforced concrete.

## KWIK-CHANGE ARBOR SYSTEM

FAST, TOOL FREE CHANGES BETWEEN DIFFERENT SIZES AND TYPES OF HOLE SAW, PLUS A SIMPLE METHOD OF CORE EJECTION AND HOLE ENLARGEMENT.

The new Kwik-Change Arbor system from Starrett offers fast, tool free changes between different sizes and types of hole saws, plus a simple method of core ejection and hole enlargement. Suitable for the standard Starrett hole saw range up to 100mm / 4" diameter, Kwik-Change will be an invaluable addition for any regular hole saw user.

## Starrett® KWIK-CHANGE | ARBOR

- Attach the arbors to all regularly used hole saws.
- Change between different sizes of saw at the push of a button!

**Push the button on the arbor and pull the hole saw down the pilot drill. To use a new hole saw, push the button on the arbor and slide the hole saw forward to remove it.**

## Starrett® KWIK-CHANGE | PILOT DRILL

- Pull back the chrome collar on the chuck to change the pilot drill.
- No tools required!
- Caution: Pilot drills may be hot after use.

**Pull back the collar on the chuck to remove the pilot drill, to insert a new drill pull back the collar on the chuck and insert the new drill.**

## Starrett® KWIK-CHANGE | HOLE ENLARGEMENT

- Attach arbors to hole saws of the same size as the existing hole and the same size as the required hole.
- Attach the larger diameter hole saw to the Kwik-Change chuck.
- Attach the smaller diameter hole saw to the drill and slide it down inside the larger diameter saw.
- Drill the hole. **This system is recommended for overhead or vertical surfaces only.**

**Attach the larger hole saw to the chuck, slide the smaller of the two hole saws inside the larger hole saw and use it as a pilot for the new, larger hole.**

## Starrett® KWIK-CHANGE | CORE EJECTION

- If the core is stuck in the hole saw after drilling a hole, press the arbor button and slide the hole saw and attached arbor off the drill.
- The pilot drill can then be used to push the core out of the saw using the side flutes or the holes in the base of the saw.
- Caution: Cores may be hot and sharp.

## QUICK-HITCH ARBORS

WITH HSS, HSS EXTENDED LENGTH OR CARBIDE TIPPED PILOT DRILLS

Two locating pins insert into the hole saw cap and prevent the hole saw overtightening on the screw thread. This allows easy and instant hole saw changes without tools and without removing the arbor from the chuck.

## SDS-PLUS ARBOR SHANKS

WITH HSS, HSS EXTENDED LENGTH OR CARBIDE TIPPED PILOT DRILLS

The SDS-Plus shank allows the arbors to be used in SDS-plus rotary hammer drills with the hammer action turned off.

## LOCKING ARBORS

WITH HSS, HSS EXTENDED LENGTH OR CARBIDE TIPPED PILOT DRILLS

For use with hole saws diameters 32mm - 210mm (1.1/4" - 8.9/32"), the arbor locks tightly on the saw eliminating vibration and is invaluable on exceptionally tough jobs and production runs.

## ARBOR PILOT DRILL

### HIGH SPEED STEEL PILOT DRILLS

| Cat. No. | Item Number | Fits Starrett Arbor Nos.   | For Use with Saw Types                     |

## ARBOR EXTENSIONS

300mm (12") extension bar.

| Cat. No. | Item Number | For use with...  | Fits Chuck Size |
|----------|-------------|--|-----------------|
| A5       | AY219       | A2, A2E, XA2 Arbors  | 13mm - 1/2"     |
| A15      | AY221       | A1, A1E, XA1, A10, A10E, XA10, A17-38, A17-38E, XA17-38 Arbors | 9.5mm - 3/8"    |

## ARBOR ADAPTOR

Allows use of hole saws up to 152mm (6").

| Cat. No. | Item Number | Description  |
|----------|-------------|--|
| KA12     | AY255       | Adaptor screws on to arbors with a 1/2" - 20 screw thread and allows use of hole saws up to 152mm (6") |

## DUAL HEX ARBOR ADAPTOR

The Starrett Dual Hex Adaptor allows fast, tool free changes between our arbors with a 6.5mm (1/4") or 8.75mm (11/32") Hex Shank, without adjustment of the drill chuck.

- Robust steel construction with hardened centre shaft and nose collar for maximum product life.
- 9.5mm (3/8") Shank fits with other branded arbors.

| Cat. No. | Item Number | For Use with   |
|----------|-------------|--|
| A18      | AY284       | A1, A1E, XA1, A4, A4E, XA4, A10, A10E, XA10, A17-38, A17-38E, XA17-38 & Cordless Smooth Cut (CSC) Hole Saws. |

## HOLE ENLARGEMENT ARBOR

Replacing the pilot drill on your arbor, the KA19 allows diameters to be enlarged by attaching a saw of the same size to that of the existing hole. This saw then acts as the pilot for the larger diameter saw that is attached to the arbor.

KA19

Please note: Hole Saws and Arbor are supplied separately.

| Cat. No. | Item Number | Minimum Hole Enlargement                                       |
|----------|-------------|--|
| KA19     | AY228       | 4.7mm (3/16") between pilot hole saw and cutting saw diameter. |

## DEBRIS COLLECTOR

NO CLEAN UP - NO DRILL DAMAGE - NO DEBRIS SPREAD

### FEATURES:

- Bowl flexes with minimal pressure as the hole is sawn.
- Huge potential time saving - there is no need to mask at risk areas prior to sawing or clean up after sawing.
- Keeps dust and other debris out of the motor of the drill.
- Suitable for hole saws up to and including 121mm (4 3/4").
- **STAGE ONE** | Pass the shank of the arbor through the hole at the bottom of the DB2 and attach to the drill in the normal way. Always ensure that the Debris Collector spins freely prior to use.
- **STAGE TWO** | Site the saw for cutting the hole. The Debris Collector can be pulled down to provide a better view of the work area.
- **STAGE THREE** | Drill the hole.
- **STAGE FOUR** | All the dirt and debris from the cut hole is collected inside the Debris Collector.

| Cat No | Item Number | Description      |
|--------|-------------|------------------|
| DB2    | AY2835      | Debris Collector |

# HOLE SAW CORE EJECTORS

A SIMPLE, BUT HIGHLY EFFECTIVE METHOD OF EJECTING THE CORE FROM A HOLE SAW AFTER COMPLETION OF THE CUT

- Select the appropriate size of ejector for the hole saw.
- Where it is necessary to assemble the two parts of the core ejector, twist the spring on to the ejector plate until it locks in place.
- Twist the spring on the assembled core ejector over the pilot drill until the pilot drill is protruding from the plate.
- Drill the hole.
- Please note that using the core ejector will reduce the cutting depth of the saw. The table below lists the recommended optimum maximum material thickness for each type of hole saw. The core ejector will function at greater material thicknesses than those listed, however its effectiveness will diminish.

HOLE SAW CORE EJECTORS

- Assembled core ejector attached to a hole saw.
- After the hole has been drilled, the core can clearly be seen at the end of the pilot drill.

| Cat No | Item Number | Description   |
|--------|-------------|---|
| KA8-1  | AY28501     | Core Ejector   suitable for 20 - 24mm hole saws     |
| KA8-2  | AY28502     | Core Ejector   suitable for 25 - 38mm hole saws     |
| KA8-3  | AY28503     | Core Ejector   suitable for 40 - 60mm hole saws     |
| KA8-4  | AY28504     | Core Ejector   suitable for 64 - 86mm hole saws     |
| KA8-5  | AY28505     | Core Ejector   suitable for 89 - 127mm hole saws #  |
| KA8-6  | AY28506     | Core Ejector   suitable for 133 - 210mm hole saws # |

| Core Ejector Cutting Recommendations |  |
|--------------------------------------|--|
| Hole Saw Product Code                | Recommended Maximum Material Thickness |
| FCH, DCH, CT                         | 7mm                                    |
| D and MPH                            | 5mm                                    |

# = MTO - Made to order, may be subject to longer lead times.

## PLEASE NOTE

In some applications it is possible that the core may be ejected from the saw at high speed. Please always wear safety glasses and gloves and take extra care if drilling vertically.

# BI-METAL UNIQUE™ HAND HACKSAW BLADES

## SAFE-FLEX™ HIGH SPEED STEEL BLADES

A patented solid state diffusion process produces the industry's most advanced bi-metal hacksaw blade.

### FEATURES

- Massive increase in tooth strength and reduction in tooth breakage and fracture when compared against traditional bi-metal blades.
- Excellent for interrupted cuts in cramped places or where the blade is subject to bending or twisting stresses.

# REDSTRIPE® HAND HACKSAW BLADES

## SOLID HIGH SPEED STEEL BLADES

### FEATURES

- Ideal when the blade is not subject to bending and twisting stresses.
- Uniformly hardened blade holds the edge when cutting hard-to-machine alloys, maintaining the straightness of the cut.

# GREY-FLEX® HAND HACKSAW BLADES

## HIGH CARBON STEEL BLADES

These all-purpose blades are an economical alternative when cutting mild steel, copper, brass, aluminium and other similar materials. The blades feature an all carbon construction with a hardened cutting edge and flexible back.

# Starrett® bi-metal unique™ saw technology

Totally different from other methods of producing bi-metal saw blades, Starrett Unique™ Technology joins two strips of high speed steel wire to a backing steel in a solid phase, using the principle of solid state diffusion bonding.

## ADVANTAGES

- **Massive increase in resistance to tooth breakage and fracture.** Unique™ Blades feature **170% more weld contact area** than standard bi-metal blades as a result of the solid state diffusion bonding process. **This ensures exceptionally strong teeth.**
- **SMOOTHER, FASTER CUTS** - Multi Edge Performance and the Split Chip Advantage generate thinner chips which are more quickly and easily removed from the saw cut. In tests, Unique™ blades proved to be an average of **35% faster than directly competing products.**
- **LONGER BLADE LIFE** - The exceptionally strong teeth, Multi Edge Performance and Split Chip Advantage ensure that Unique™ blades last an average of **35% longer than competing blades.**
- **LOWER COST PER CUT** - The increase in resistance to tooth breakage and fracture, smoother, faster cuts and longer blade life all combine to guarantee one simple benefit - lower cost per cut.

Starrett Bi-Metal Unique™ Saw Technology is currently available in our Safe-Flex™ Hand Hacksaw Blades, Unified Shank™ Jigsaw Blades and Intenss Bandsaw Blades.

### EXACT® PLUS

## K145 CLOSED GRIP - HIGH TENSION

Heavy-Duty Hacksaw Frame with Closed Grip. A professional quality, high-tension hack saw frame that is easy to use with an efficient adjustment lever.

### FEATURES

- 300mm (12") Starrett Bi-Metal Unique, high speed steel Safe-Flex hacksaw blade included.
- The handle is covered by rubber overmould for comfortable grip.
- Six turns of the tensioning handle will tension the blade to the recommended point.

| Cat. No. | Item Number | Description  |
|----------|-------------|--|
| K145     | BS550       | High-Tension Heavy-Duty Hacksaw Frame, Closed Grip |

## 146 HOBBY SAW

| Cat. No. | Item Number |
|----------|-------------|
| 146      | BS555       |

# = MTO - Made to order, may be subject to longer lead times.

Ideal for lightweight cutting, particularly suitable for cutting in restricted places, unreachable by conventional hacksaw frames. The Hobby Saw accepts 250mm or 300mm (10" or 12") blades.

# HACKSAW FRAMES

## K147 BI-METAL COMPASS SAW

The ideal tool for cutting plasterboard, featuring a heavy-duty, variable pitch, bi-metal blade to cut most materials and provide an extra-long cutting life.

### FEATURES

- 225mm (9") Starrett Bi-Metal Unique Blade included.
- Heavy duty plastic handle for ideal comfort and the best cutting leverage provides easy cutting.
- The blade rotates full 360° to easily cut at any angle.

| Cat. No. | Item Number | Description           |
|----------|-------------|-----------------------|
| K147     | B5562       | Compass Saw, Bi-Metal |

# = MTO - Made to order, may be subject to longer lead times.

## K148 PVC SAWS

Used for cutting PVC and ABS materials. Also used for cutting plasterboard, plywood and general-purpose cutting.

### FEATURES

- It is shipped with a 300mm (12") or 450mm (18") blade length.
- Featuring cast aluminium handle.

| Cat. No. | Item Number | Description                   |
|----------|-------------|-------------------------------|
| K148-12  | B5572       | Handle with 300mm (12") Blade |
| K148-18  | B5577       | Handle with 450mm (18") Blade |

# = MTO - Made to order, may be subject to longer lead times.

## REPLACEMENT BLADE FOR 148

- Used for cutting plasterboard, plywood and general purpose cutting.

| Cat. No. | Item Number | Dimensions  |
|----------|-------------|-------------|
| PVC-12   | B5575       | 300mm(12")  |
| PVC-18   | B5582       | 450mm (18") |

# = MTO - Made to order, may be subject to longer lead times.

## 149 TUBULAR HACKSAW FRAME

Knurled, closed, high-impact plastic handle ensures convenience and firmness in handling. It only allows the use of 300mm (12") saws, which can be mounted to cut in any of the four directions, tensioned by a butterfly nut.

### FEATURES

- Light arch with closed handle.
- Greater robustness and rigidity.
- High-impact plastic knurled handle.
- Ensures convenience and firmness in handling.

| Cat. No. | Item Number | Depth         |
|----------|-------------|---------------|
| 149      | B5597       | 95mm (3.3/4") |

# = MTO - Made to order, may be subject to longer lead times.

# bi-metal unique™ saw technology

unified™  
shank

Totally different from other methods of producing bi-metal saw blades, Starrett Unique™ Technology joins two strips of high speed steel wire to a backing steel in a solid phase, using the principle of solid state diffusion bonding.

## ADVANTAGES

- Massive increase in resistance to tooth breakage and fracture. Unique™ Blades feature 170% more weld contact area than standard bi-metal blades as a result of the solid state diffusion bonding process. This ensures exceptionally strong teeth.
- Smoother, faster cuts. Multi Edge Performance and the Split Chip Advantage generate thinner chips which are more quickly and easily removed from the saw cut. In tests, Unique™ blades proved to be an average of 35% faster than directly competing products.
- Longer blade life. The exceptionally strong teeth, Multi Edge Performance and Split Chip Advantage ensure that Unique™ blades last an average of 35% longer than competing blades.
- Lower cost per cut. The increase in resistance to tooth breakage and fracture, smoother, faster cuts and longer blade life all combine to guarantee one simple benefit - lower cost per cut.

Starrett Bi-Metal Unique™ Saw Technology is currently available in our Safe-Flex™ Hand Hacksaw Blades, Unified Shank™ Jigsaw Blades and Intenss Bandsaw Blades.

BI-METAL UNIQUE™ SAW TECHNOLOGY

## THE BONDING PROCESS

- Two strips of high speed steel wire are joined to the backing steel in a solid phase.

## THE CONTACT AREA

- 1. Traditional bi-metal blades feature one high speed steel wire, electron beam welded to the backing material.
- 2. Unique™ blades feature two wires, joined laterally to the backing steel in a solid phase, providing 170% more weld contact area.

## MULTI EDGE PERFORMANCE

- After initial use the soft backing material in the centre of the blade will wear away, forming a groove which acts as a natural chip breaker, and providing the blade with multiple cutting edges - Multi Edge Performance

## SPLIT CHIP ADVANTAGE

- The multiple cutting edges produce thinner chips that are more easily removed from the saw cut - The Split Chip Advantage.

# dual cut™

## CLEAN CUT ON BOTH SIDES OF THE MATERIAL

### DUAL CUT JIGSAW BLADES UNIFIED SHANK

For the ultimate in surface finish on both sides of the material being cut, Starrett Dual Cut™ Jigsaw Blades are the ideal solution. The revolutionary patented tooth design means that Dual Cut blades cut on the upstroke and the downstroke, ensuring that there is no breakout on either side of the material and minimal chipping of any surface coating. Dual Cut™ blades are ideal for any application where quality of surface finish is important. Made from Starrett's Bi-Metal Unique™ Saw Technology, this provides 170% greater resistance to tooth breakage, longer life and lower cost per cut than other blade manufacturers.

#### FEATURES

- Particularly suited to cutting soft and hard wood, MDF, acrylic, Formica, melamine, and other coated materials
- Available in standard or scroll cut format
- Lasts 25% longer than other jigsaw blades
- Fast, precise, burr-free cutting
- Dual cutting action
- 170% greater resistance to tooth breakage
- Unified shank

**OUR JIGSAW BLADES LAST 25% LONGER\***  
**STRONGER WITH 170% MORE WELD CONTACT**  
**FASTER, SMOOTHER & MORE PRECISE CUTS\*\***  
**UNBREAKABLE\*\*\***

**PERFECT FINISH ON BOTH SIDES!** (A) (B)

\* On average when compared to existing bi-metal blades.  
 \*\* With our Multi Edge Performance & Split Chip Advantage.  
 \*\*\* During normal use.

# PROTRACTORS

# PROSITE PROTRACTOR

## 505A-12 AND 505A-7 ALUMINIUM MITRE

The popular ProSite 505 Protractor family consists of two 300mm (12") combination protractors, a 300mm (12") mitre protractor and two 175mm (7") mitre protractors. The combination protractors take the guesswork out of these functions: mitre cuts, single cuts, compound mitre cuts, included conversion table, protractor and roof pitches. The mitre protractors are ideal for carpenters, plumbers and all building trades that require the measuring and transferring of angles.

### FEATURES

- ProSite Protractors take error-prone calculations out of the process of mitre cuts.
- This easy-to-use tool has two laser engraved scales.
- Mitre cut scale transfers readings directly to the mitre saw for mitre joints.
- Single cut scale transfers readings directly to the mitre saw.
- Made from durable 6.5mm (1/4") aluminium with Teflon® "O" ring for smooth and precise operation.
- Protractor saves time and reduces waste.

| Cat. No.  | Item Number | Description                  |

Large plastic utility knife with automatic locking metal blade guide.

#### FEATURES

- This utility knife works with 18mm (.710") blade (KS06R).
- ABS plastic body and rubber plastic overmoulded.
- Blade with 8 break-away segments.

## S011 HIDDEN EDGE® - SAFETY KNIFE. RETRACTABLE BLADE

The blade stays safely tucked away when not in use. Simply release the safety lock and squeeze the lever to use. With quick release blade change and storage for spares in the body, blade changes are fast and tool-free.

### FEATURES

- This utility knife is supplied with 3 trapezoidal blades (KS01R).
- It also works with hook blades (KSH01R).
- Easy to use safety lock and lever allows the blade to be exposed instantly.
- Thumb wheel accurately adjusts cutting depth.
- Fast, tool-free blade changes.

## TORPEDO LEVELS

### STARRETT TORPEDO

Manufactured with 225mm (9") extruded aluminium frames with high visibility yellow and red ABS plastic construction for impact resistance.

#### FEATURES

- Vertical, horizontal, and 45° vials.
- V-grooved top surface and magnetic bottom surface.

| Cat. No. | Item Number | Length     | Magnetic Model |
|----------|-------------|------------|----------------|
| KLT59-N  | DV8205      | 225mm / 9" | Yes            |

### STARRETT EXACT TORPEDO

Manufactured with 240mm (9.1/2") extruded aluminium frames and finished with red high visibility powder coat paint, including impact resistant ABS grey plastic end caps.

#### FEATURES

- Vertical, horizontal, and 45° vials.
- Milled top surface finished with a V-groove and a magnetic bottom surface.
- Includes impact resistant ABS plastic end caps.

| Cat. No. | Item Number | Length         | Magnetic Model |
|----------|-------------|----------------|----------------|
| KLTX95-N | DV8232      | 240mm (9-1/2") | Yes            |

## STARRETT BOX BEAM

Produced with aluminium special box shape cross section frame for improved strength and rigidity.

### FEATURES

- Two vertical vials and one horizontal vial with ABS plastic vial holders.
- Shock-absorbing end caps to protect working edges and preserve accuracy.

| Cat. No. | Item Number | Length       | # |
|----------|-------------|--------------|---|
| KLBS72-N | DV8202      | 1800mm (72") | # |

# = MTO - Made to order, may be subject to longer lead times.

## STARRETT EXACT BOX BEAM

Manufactured of heavy duty aluminium with special box shape cross section frame for improved strength. The levels are designed with comfortable hand grips with soft touch.

### FEATURES

- Two vertical vials and one horizontal vial with ABS plastic vial holders accurate to 0.001mm / 25mm (0.0005" / inch).
- Shock-absorbing end caps to protect working edges and preserve accuracy.
- Available with milled only or milled and magnetic bottom surface.

| Cat. No.  | Item Number | Length       | Magnetic | # |

## RULES

### STRAIGHT EDGE ALUMINIUM RULE

#### AMSE SERIES

Straight edge aluminium rules are parallel, made of anodized aluminium with smooth, square and straight edges. Centimetre and millimetre graduation readings on either edge.

#### FEATURES

- Ideal for schools and shops, wood-workers, tinsmiths, metal workers, and bench applications.
- They lie flat, resist bending and feature large, easy to read graduations and numbers that are heavier than conventional machine graduated scales.
- Rules are 50mm (2") wide with centimetre and millimetre graduations reading on either edge.
- Accurate and flexible.

| Cat. No.  | Item Number | Length | Thickness |   |
|-----------|-------------|--------|-----------|---|
| AMSE-500  | DS0581      | 500mm  | 2mm       | # |
