#### CONTENTS GUIDE

### QUAD DRIVE SPANNERS

SP Tools patented QUAD DRIVE open end offers 4 times the gripping power of a standard ROE spanner by wrapping around the fastener and maximising the contact on the flat sides of the fastener head, not the points

### FLARE NUT SPANNERS

SP Tools FLARE NUT spanners feature oversized spanner head surfaces that grip multiple sides of the fastener to reduce rounding. Ideal for use on soft fittings in aluminium, copper and brass on fuel, brake, air conditioning, diesel lines and diesel injectors

### FLAT DRIVE RING END

SP Tools RING END spanners feature flat drive ring ends, making them the perfect spanner for getting to and loosening those tricky, hard to reach, often worn fasteners by increasing the contact area with the nut or bolt head

### E-TORX DOUBLE RING END

SP Tools E-TORX spanners are ideal for applications where specialised E-Torx spanners are required, such as on most European car makes and models
