LIGHTING

SP'S HIGH PERFORMANCE, QUALITY LIGHTING SOLUTIONS

SP's cordless range of quality work lights are manufactured to the highest standards to suit the needs of the professional and are built to last. The full product range covers a number of lighting needs from small and compact hand-held work lights all the way up to ultra bright flood lighting. SP is constantly pushing the boundaries of LED and battery technology to bring you cutting edge work lights that will ensure you always have the most reliable, best performing tools on the market. Longer run time, brighter lighting and innovative design is at the core of the SP cordless lighting range.

WIRELESS CHARGE LIGHTING

One of SP's latest innovative breakthroughs is the incorporation of new wireless charging technology into the work light platform.

No longer do you have to plug your work light into a charger over night. The new pad style charger allows you to simply place the work light on the charging pad and the charging process instantly begins. Magnetic zones on the front of the charging pads firmly hold the work lights in place at any angle, while the heavy duty rear magnets allow for the charging pad to be instantly mounted onto any magnetic surface such as a steel tool box or work top.

The chargers are not only compatible with SP work lights but also the latest Android & iPhones, Apple Watches, AirPods, tablets and more.
