

3 FASTENING TOOLS

LONG REACH, COMFORTABLE AND SECURE

STANLEY® is one of the world's preeminent manufacturers of fastening tools which are indispensable, must-own line of tools in every professional toolbox. This broad category includes four distinct and distinguished tool lines: staplers (manual and electric), hammer tackers, hand "pop" riveters and electric glue guns. There are nearly 2 dozen fastening tools, so if you've got something to fasten down or hold together, STANLEY® has the tool to get the job done right.

Comfort, quality and versatility are the three attributes we engineer into our screwdriver line. STANLEY® screwdriver handles are shaped and sized to provide comfort in the hand and torque at the fastener head. The materials and construction are of the highest quality to resist corrosion, chipping and breaking. And with tips ranging from standard to Phillips® to Torx® to square, STANLEY® screwdrivers cover almost every application.

FIXED SCREWDRIVER BARS

TIP

- Forged
- Shoulder grind
- Face grind
- Can be magnetic, black oxide, or blasted

Fully heat treated bar for toughness & strength

BAR

- Coated to prevent rust
- Lacquer
- Black oxide
- Nickel plate
- Chrome

Can be mill finished, tumbled, blasted or polished

BOLSTER

- Allows extra torque to be applied with a wrench when necessary
- Stops bar push-through when struck

WINGS

Two wings are formed in the blade at the handle end: These cut into the hole of the handle when driven in under pressure and prevent the bar turning inside the handle.

Phillips® is a registered trademark of Phillips Screw Company
Torx® is a registered trademark of Acument Intellectual Properties, LLC

SCREWDRIVER HANDLES

Handle materials impervious to chemicals

Shape/texturing for grip and mechanical advantage

Tip identification

Small diameter for speed turning

TIP DIFFERENCES

SLOTTED TIP DIFFERENCES

SLOTTED Screwdrivers are referred to by their Blade Length and Tip Configuration

Flared Tip :
The strongest, for heavy-duty

Cabinet Tip :
Used when fitting into counter bore

PHILLIPS & POZIDRIV

Referred to by a Number Point smallest = 0 point to largest = 4 point

PHILLIPS
Screws have 4 recessed cross 'slots' tapered conically.

Driver Tip has 4 tapered wings separated by 4 hollow flutes.

POZIDRIV (common in Europe)
Screws have 4 recessed parallel cross 'slots' and, also, a square recess at the centre.

Driver Tip has 4 straight parallel wings and between each wing is a square-section rib to fit the screw centre.

Cushion Grip 2 Screwdriver

- Improved ergonomic design for maximum grip and torque
- Ergonomically designed, bi-material handles for maximum comfort and for greater torque to be applied with less effort
- Chrome vanadium blade with tough hardened black oxide tips
- Nickel-plated bar for corrosion resistance
- High quality, heat treated plated bars for lasting "pro" performance and rust resistance
